Happy Wife, Happy Kids = Happy Life!

Project: Residential Domestic – Frank's Home

Key Objectives

- A place to call my own, as well as somewhere to put my 'junk'.
- Getting it done by Christmas – it's only taken 16 years!
- Organising a time with Ross (the concreter) to provide a concrete floor slab.

Challenges

- My wife – making sure that this shed is visually tidy in our backyard.
- My son – making sure that this shed doesn't impact on his cricket pitch.
- My daughter – making sure she is still able to have her swings.
- Me – it's time for me to have a shed.

Frank's Solutions

- Making the shed a reality.
- Not impacting the family.
- Mission achieved – life is *great* – and I'd highly recommend it to anyone!

Zachary's Joke:

Q – Why is a pile of dirty dishes like a good basketball player?

A – No one likes to see them sitting on the bench

Zachary Simone – 12 years old – hopes you enjoy this joke!

Need help on an upcoming project? - then please call me today.
